DIVISION FOURTEEN – WATER BODY PROVISIONS – SCHEDULE “G”

1401 Floodplain Management Provisions

The purpose of the floodplain management provisions is to reduce the risk of injury, loss of life, and damage to buildings and structures due to flooding. However, neither the City nor the Province of British Columbia represent to any person that any building or structure, including a manufactured home, used, constructed or located in accordance with the following provisions will not be damaged by flooding.

1. Interpretation

For the purposes of this Section, the following definitions shall apply:

DESIGNATED FLOOD means a flood, which may occur in any given year, of such magnitude as to equal a flood having a 200-year recurrence interval, based on a frequency analysis of unregulated historic flood records or by regional analysis where there is inadequate stream flow data available. Where a large watercourse or body of water is controlled by a major dam, the designated flood shall be set on a site specific basis.

DESIGNATED FLOOD LEVEL means the observed or calculated elevation for the Designated Flood, which is used in the calculation of the Flood Construction Level.

FLOOD CONSTRUCTION LEVEL means a Designated Flood Level plus Freeboard, or where a Designated Flood Level cannot be determined, a specified height above a Natural Boundary, Natural Ground Elevation, or any obstruction that could cause ponding.

FLOODPLAIN means an area which is susceptible to flooding from an adjoining watercourse, lake, or other body of water and is designated in Section 1401.2 of this bylaw.

FLOODPLAIN SETBACK means the required minimum distance from the Natural Boundary or other reference line of a watercourse, lake, or other body of water to any landfill or structural support required to elevate a floor system or pad above the Flood Construction Level, so as to maintain a floodway and allow for potential land erosion.

FLOODPLAIN WATERCOURSE means any natural or man-made depression with well defined banks and a bed of 0.6 m, (1.968 feet) or more below the surrounding land serving to give direction to a current of water including rivers, creeks, springs, ravines, swamps and gulches, whether usually containing water or not.

FREEBOARD means a vertical distance added to a Designated Flood Level, used to establish a Flood Construction Level.

DIVISION FOURTEEN - WATER BODY PROVISIONS - SCHEDULE "G"

G.S.C. means Geodetic Survey of Canada datum.

HABITABLE AREA means any space or room, including a manufactured home, that is or can be used for dwelling purposes, business, or the storage of goods which are susceptible to damage by floodwater.

MANUFACTURED HOME means a single family dwelling built in an enclosed factory environment, in one or more sections, intended to be occupied in a place other than of its manufacture. Manufactured homes include MOBILE HOMES and MODULAR HOMES which are either completely self-contained dwelling units, or are incomplete dwelling units which are fastened together and completed on site. All new manufactured homes must be constructed to either the CAN/CSA Z240 (mobile home) standard, the National Building Code of Canada, or the Provincial Building Code where manufactured.

NATURAL BOUNDARY means the visible high water mark of any lake, river, stream, or other body of water where the presence and action of the water are so common and usual and so long continued in all ordinary years as to mark upon the soil of the bed of the lake, river, stream, or other body of water a character distinct from that of the banks thereof, in respect to vegetation, as well as in respect to the nature of the soil itself, as defined in Section 1 of the Land Act, and also includes the edge of dormant side channels of any lake, river, stream, or other body of water, and marshes.

NATURAL GROUND ELEVATION means the undisturbed ground elevation prior to site preparation.

PAD means a paved surface on which blocks, posts, runners or strip footings are placed for the purpose of supporting a manufactured home, or a concrete pad for supporting a Habitable Area.

- d. The Flood Level or Flood Construction Level for any watercourse identified in Sections 1401.3.a and b above shall be taken perpendicular to the natural boundary of the watercourse at its highest perpendicular point.
- e. The Building Inspector, or such person appointed by Council may require that a British Columbia Land Surveyor's certificate be required to verify compliance with the Floodplain Elevations and Setbacks specified in Sections 1401.3.a and 1401.3.b of this bylaw. The cost of verification shall be assumed by the landowner.
- f. Pursuant to Section 910(5) of the Local Government Act, the City may grant exemptions from the application of floodplain setbacks and flood construction elevations provided that:
 - i. The property owner submits a written request for an exemption to the City; and
 - ii. The exemption is consistent with the Provincial Guidelines; or A professional engineer or geoscientist, or other prescribed person, certifies that the property can be safely used for the intended use.

1402 Riparian Areas Regulation Provisions

The Riparian Areas Regulation apply to all Development related to residential, commercial and/or industrial activities.

1. Interpretation

For the purposes of this Section, the following definitions shall apply:

- a. **DEVELOPMENT** means any of the following associated with or resulting from the local government regulation or approval of residential, commercial or industrial activities to the extent that they are subject to local government powers under the Local Government Act:
 - i. removal, alteration, disruption or destruction of vegetation;
 - ii. disturbance of soils;
 - iii. construction or erection of buildings and structures;
 - iv. creation of non-structural impervious or semi-impervious surfaces;
 - v. flood protection works;

DIVISION FOURTEEN - WATER BODY PROVISIONS - SCHEDULE "G"

- vi. construction of roads, trails, docks, wharves, and bridges;
 - vii. provision and maintenance of sewer and water services;
 - viii. development of drainage systems;
 - ix. development of utility corridors;
 - x. subdivision as defined in Section 872 of the Local Government Act.
- b. **HIGH WATER MARK** means the high water mark or water level in a watercourse that is reached during annual flood events, as indicated by the presence of soil and/or vegetation that due to the frequent presence of water is distinctly different from the vegetation of adjacent upland areas.
- c. **QUALIFIED ENVIRONMENTAL PROFESSIONAL (QEP)** means an applied scientist or technologist acting alone or together with another qualified environmental professional, if the individual is registered and in good standing in BC with an appropriate professional organization constituted under an act, acting under that associations code of ethics and subject to disciplinary action by that association, the individual's area of expertise is recognized in the assessment methods as one that is acceptable for the purpose of providing all or part of an assessment report in respect of that development proposal, and the individual is acting within that individual's area of expertise.
- d. **RIPARIAN ASSESSMENT AREA** means the area within 30 metres of the high water mark of a riparian watercourse; within 30 metres of the top of the ravine bank in the case of a ravine less than 60 metres wide; and within 10 metres of the top of the ravine bank in the case of a ravine 60 metres wide or greater.
- e. **TOP OF RAVINE BANK** means the first significant break in a ravine slope where the break occurs such that the grade beyond the break is flatter than 3:1 for a minimum distance of 15 metres measured perpendicularly from the break, and the break does not include a bench within the ravine that could be developed.
- f. **RIPARIAN WATERCOURSE** means any natural or man-made depression with well defined banks serving to give direction to a current of water, including rivers, creeks, springs, ravines, swamps, and gulches and any of the following that provides fish habitat: a pond, lake, river, creek or brook, and; a ditch, spring or wetland that is connected by surface flow to a riparian watercourse.

2. Riparian Area Setbacks

Development may not occur within the Riparian Assessment Area unless:

DIVISION FOURTEEN - WATER BODY PROVISIONS - SCHEDULE "G"

- a. a lesser setback is determined by an assessment completed by a QEP under the Riparian Areas Regulation, or
- b. an approval is granted under the Riparian Areas Regulation by the applicable provincial or federal agency, or
- c. in the case of a subdivision as defined in Section 872 of the Local Government Act, where no modifications are proposed within the Riparian Assessment Area and a Section 219 covenant has been registered on the title of the property restricting development within the Riparian Assessment Area and it has been deemed that a sufficient building envelope, suitable building site and sewage disposal area can be provided.

1403 Farming Area Provisions

1. Interpretation

For the purposes of this Section, the following definitions shall apply:

AGRICULTURAL UNIT means equal to the live weight of 455 kg (1000 lbs) of livestock, poultry or farmed game or any combination of them equalling 455 kg.

AGRICULTURAL WASTE STORAGE FACILITY means a facility used to contain agriculture liquid or solid waste, or biosolids prior to use or disposal, but does not include a vehicle or any mobile equipment used for transportation or disposal of agriculture solid or liquid waste. An agriculture waste storage facility includes a structure, reservoir, lagoon, cistern, gutter, tank or bermed area for containing agricultural waste prior to its use or disposal.

CHANNELIZED STREAM means permanent or relocated streams that have been dyked, diverted or straightened and carry drainage flows from headwaters or significant sources of groundwater. Reaches of channelized streams may be confined by roads and fences and in many cases also meander through fields. Channels that divert irrigation water from a stream but return overflow water back to a stream in a manner that allows fish access are classified as channelized streams.

CONFINED LIVESTOCK AREA means an outdoor, non grazing area where livestock, poultry or farmed game is confined by fences, other structures or topography including feedlots, paddocks, corrals, exercise yards and holding area, but not including seasonal feeding areas.

CONSTRUCTED CHANNELS AND DITCHES means man made drainage channels that carry drainage water from more than one property but do not carry water from headwaters or significant sources of groundwater. Flows in agricultural constructed channels may be year round and are not regulated. Constructed channels may also deliver water for irrigation purposes.

DIVISION FOURTEEN - WATER BODY PROVISIONS - SCHEDULE "G"

IMPERVIOUS SURFACE means a building or constructed surface made of concrete, asphalt, plastic or other material that does not permit water to soak into the ground.

NATURAL STREAM means watercourses that have not been significantly altered by human activity and are predominantly in their natural state as defined by the watercourse definition in this Section.

SEASONAL FEEDING AREA means an area used for forage or other crop production and used seasonally for feeding livestock, poultry or farmed game that is primarily sustained by supplemental feed, but does not include a confined livestock area or grazing area.

SOLID AGRICULTURAL WASTE means agricultural waste that is 20% or more solid matter and will not flow when piled.

TOP OF BANK means the first break in a bank slope where the break occurs such that the grade beyond the break is flatter than 3:1 for a minimum distance of 15 m measured horizontally from the break. For multiple banks, the setback distance will be measured from the top of the bank that is farthest from the center of the stream.

WATERCOURSE means a natural watercourse or source of water supply, whether usually containing water or not, and a lake, river, creek, spring, ravine, swamp and gulch.

Floodplain Provisions may require larger setbacks in some instances and will then override the setback standards shown here.

** Categories 1 and 2 are set by the Agricultural Waste Control Regulation under the Environmental Management Act.

*** Unless a lesser setback is determined by an assessment completed by a Qualified Environmental Professional and in accordance with Floodplain regulations.

a Setback distances are measured horizontally from the watercourse top of bank to the outside of the foundation wall.

b Channel width is determined from the top of bank to top of bank.

c There is no differentiation between constructed channels and constructed ditches for the purposes of building setbacks, only for drainage maintenance purposes.

d The setback from a domestic water intake for uses noted within this table is 30 m.
